Information security and Data Leakage prevention

Attempt No: 2

This is a sample description about the Infosec and DLP, this gives the overall idea about the course and the parts of the course, attempt numbers and the pass percentage.

Data loss prevention (DLP), per Gartner, may be defined as technologies which perform both content inspection and contextual analysis of data sent via messaging applications such as email and instant messaging, in motion over the network, in use on a managed endpoint device, and at rest in on-premises file servers or in cloud applications and cloud storage. These solutions execute responses based on policy and rules defined to address the risk of inadvertent or accidental leaks or exposure of sensitive data outside authorized channels.

DLP technologies are broadly divided into two categories – Enterprise DLP and Integrated DLP. While Enterprise DLP solutions are comprehensive and packaged in agent software for desktops and servers, physical and virtual appliances for monitoring networks and email traffic, or soft appliances for data discovery, Integrated DLP is limited to secure web gateways (SWGs), secure email gateways (SEGs), email encryption products, enterprise content management (ECM) platforms, data classification tools, data discovery tools, and cloud access security brokers (CASBs).

The course consist of two parts, a video presentation course and a assessment, you have achieve 80% or above to pass the course. you have 3 attempts to clear the assessment. You can take the assessment only after you have completed all the modules of the course content.

Information security and Data Leakage prevention-Assessment

This is part two of the course

1. This assessment comprises of 20 multiple choice questions
2. You have a maximum time limit of 90 minutes to complete the assessment
3. The assessment will automatically timeout and marked complete post 90 minutes, and your progress so far will be recorded
4. You have to achieve 80% or above to pass the course
5. You have 3 attempts to clear the assessment
6. Each attempt will be recorded automatically and an email will be sent to you as well to mark your progress
7. Once you clear the assessment, the course will be automatically marked complete and you can exit the screen.
8. A copy of the course completion certificate will be sent to you through email and you can download the same as well in the transcripts page
9. The assessment has to be taken in one go and cannot be interrupted, hence please click on Take Assessment button once you are ready.

Security and information safety Assessment

35 mins remaining

Question 1

Three Candidates Contested in a election and received 1136, 1234, 7636 votes respectively. What percentage of the total votes did winning candidate get?

- ☐ A. 57%
- ☐ B. 37%
- ☐ C. 27%
- ☐ D. 17%

Question 2

Three Candidates Contested in a election and received 1136, 1234, 7636 votes respectively. What percentage of the total votes did winning candidate get?

- ☐ A. 57%
- ☐ B. 37%
- ☐ C. 27%
- ☐ D. 17%

Question 3

Three Candidates Contested in a election and received 1136, 1234, 7636 votes respectively. What percentage of the total votes did winning candidate get?

- ☐ A. 57%
- ☐ B. 37%
- ☐ C. 27%
- ☐ D. 17%

Question 4

Three Candidates Contested in a election and received 1136, 1234, 7636 votes respectively. What percentage of the total votes did winning candidate get?

- ☐ A. 57%
- ☐ B. 37%
- ☐ C. 27%
- ☐ D. 17%
